

BLUES POWER DELUXE

The Blues Power Deluxe represents the pinnacle of overdrive and boost pedal design—crafted for the discerning guitarist who demands nothing less than perfection. Every detail has been meticulously considered, from the hand-selected, high-quality components to the hand-wired, classic through-hole construction. Featuring ultra-low noise resistors, polyester film capacitors, and the finest toggle and foot switches, this pedal offers unmatched clarity and performance. The Blues Power Deluxe ensures a flawless signal path with silent, pop-free soft switching, delivering the ultimate in both reliability and tone.

TREBLE

Powerful treble control shapes high frequencies with precision and responsiveness.

BASS

Bass control ranges from tight, screamer-style lows to deep, heavy thumping bass.

DRIVE

Wide-range drive control takes you from clean tones to searing lead.

TOP-END

Active Pre-Tone toggle boosts highs for glassy tube-like tones or edgy amp-style bite.

BOOST

Boost footswitch toggles between two drive settings.

POWER

Power from internal 9V battery or external 9–18V DC supply.

VOLUME

High-output volume control lets you push tube amps or drive pedals for smooth, natural overdrive.

DUAL CLIPPING

Dual clipping stages deliver tube-like overdrive with smooth, natural feel, soft clipping, rich sustain, and no harsh top end.

BOOST

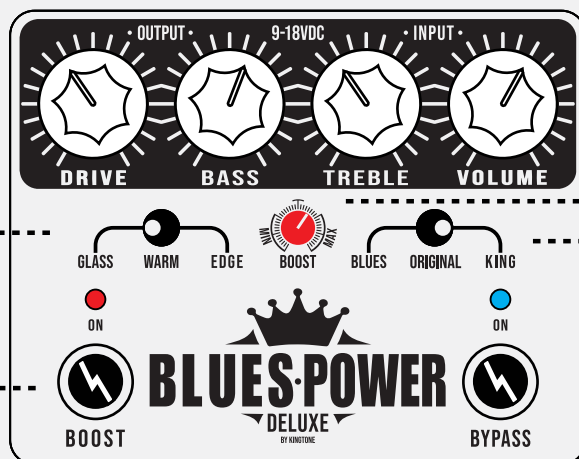

Boost control sets a second drive level, giving dual-overdrive versatility without added complexity.

VOICE-TOGGLE

Blues, Original, and King settings shape the pedal's voice. King adds attack and thickness; Blues delivers a massive, full sound.

TRUE BYPASS

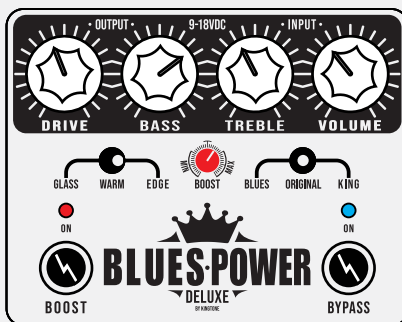

Silent, soft-switching true bypass with fully preserved tone and short, isolated traces.
